

## DATASHEET

Titus Classification for Mobile is an intuitive email and mobile data protection solution that guides users as they create, forward, or reply to messages. Titus lets users identify and classify email sensitivity using visual markings and metadata, which helps raise security awareness and supports best practices around information handling and security regulation compliance.

The solution enables organizations to assign customized classification levels that help enforce their data security policy. They can also indicate parameters to identify safe email recipients, force certain classifications when necessary, restrict attachments from being viewed, validate content contained within email messages, prevent classifications from being downgraded, and even prevent users from opening certain emails on their mobile devices.

### Best-in-class email classification

Titus Mail is a standalone email application that can be deployed easily without disrupting existing workflows, supporting interoperability between their iOS or Android mobile device and Windows- or Mac-based computers. Titus Mail provides a highly secure email application that enables organizations to address their biggest mobile data security concerns. The app supports essential mail classification capabilities while maintaining the familiar and intuitive interface of the Titus suite of classification solutions.

### Industry-leading interoperability

Titus classification capabilities can be seamlessly integrated with leading mobile enterprise email productivity solutions from VMware and BlackBerry, offering users maintained functionality on the go. Users of these tools can maintain robust multi-level Titus classifications of emails sent between mobile and desktop endpoints with minimal configuration effort.

## WORKS HOW YOU WORK

Organizations can leverage Titus to enhancing their mobile data protection strategy in two ways:

- Titus Mail for iOS or Android offers best-in-class mobile email classification for users deploying their mobile device's native email client
- Customers who have invested in UEM or EMM solutions can leverage robust Titus classification capabilities by way of interoperability with VMware Boxer or BlackBerry Work

## GAIN PEACE OF MIND

Titus Classification for Mobile enables organizations to stop mistakes before they happen using advanced data loss prevention policies for mobile email. Corporate data remains secure as an efficient mobile workforce is empowered to work from anywhere at any time.

# Titus Classification **for Mobile**

## Titus Mail **for iOS or Android**

Titus Mail can be used on both iOS and Android mobile devices, providing enhanced security, increased productivity, and ecosystem compatibility for all mobile workers.
